

Streamline Back-of-House Operations

Eliminate inefficiencies, drive transparency, and ensure operational productivity with Kipsu's integration with Quore, one of the world's leading maintenance and operations management systems. By connecting the data of these two essential systems, your team can submit requests, view ticket updates, and communicate back to guests all within the Kipsu dashboard. Kipsu's integration with Quore requires an active account with both Quore and Kipsu.

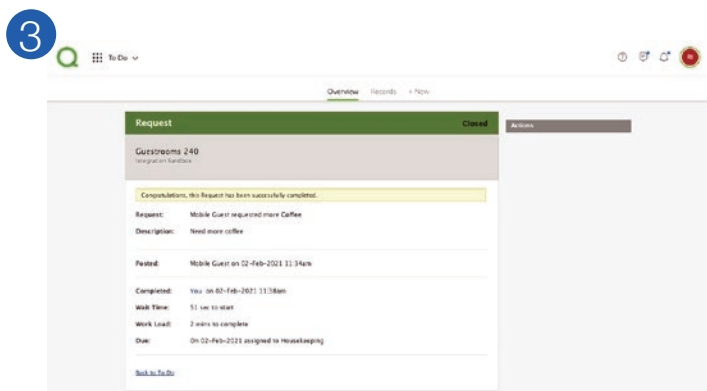

How it Works

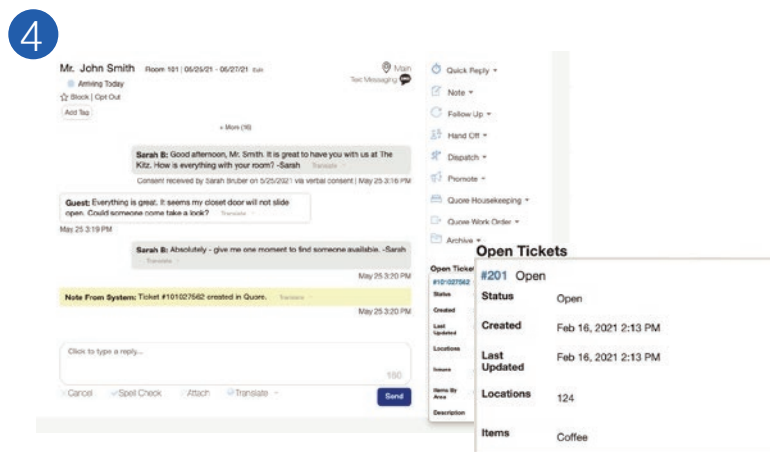

Once Kipsu's Quore integration is enabled, "Quore Housekeeping" and "Quore Work Order" will appear on the right-hand side of each guest's conversation window.

The drop-down allows your team to add a location, item, and any necessary comments to the request. Once created, the ticket will be sent to your Quore system.

The ticket will then operate identically to any other ticket in your Quore platform and can be updated and moved as needed within Quore.

As updates are made by housekeeping and maintenance teams, or other staff members, the ticket's status will also update within the Kipsu dashboard, directly on the guest's conversation window.

*Integration between Quore and Kipsu is \$35/month paid directly to Quore.
